THE SameDayTeethSuite PROMISES

Aesthetics

We will give you your smile back complete with any personalisations you want to look like you.

Functional safeness

stability, phonetics, no pain

We will give you the confidence to eat & chew again free from embarrassment.

Fixed natural teeth

We will give you the option of fixed teeth which can be brushed and cleaned just like your own teeth to totally restore your smile.

Safe transitional period

We ensure a comfortable transition through the treatment, always ensuring you have something to protect your confidence during the treatment stages.

Long term stability

We only use the best quality dental implants, highly skilled technicians & latest laboratory materials to ensure a durable robust solution for you.

Predictability

We tell you what's going to happen and when so that you have peace of mind from knowing the steps to your new teeth.

Our treatment plans are fully inclusive of everything that is needed.

GUARANTEED SATISFACTION GUARANTEED FUNCTION GUARANTEED PRICE

SameDay Teeth Suite
Personalised Implants & Fixed Dentures

WHO GETS DENTAL IMPLANTS & FIXED TEETH?

Anyone whose condition or teeth make them feel embarrassed

Got many bad teeth and looking for a fresh start?

Got lots of failing root canals & crowns?

Got severe gum disease that can't be fixed?

Got failing bridges & can't bear the thought of a denture?

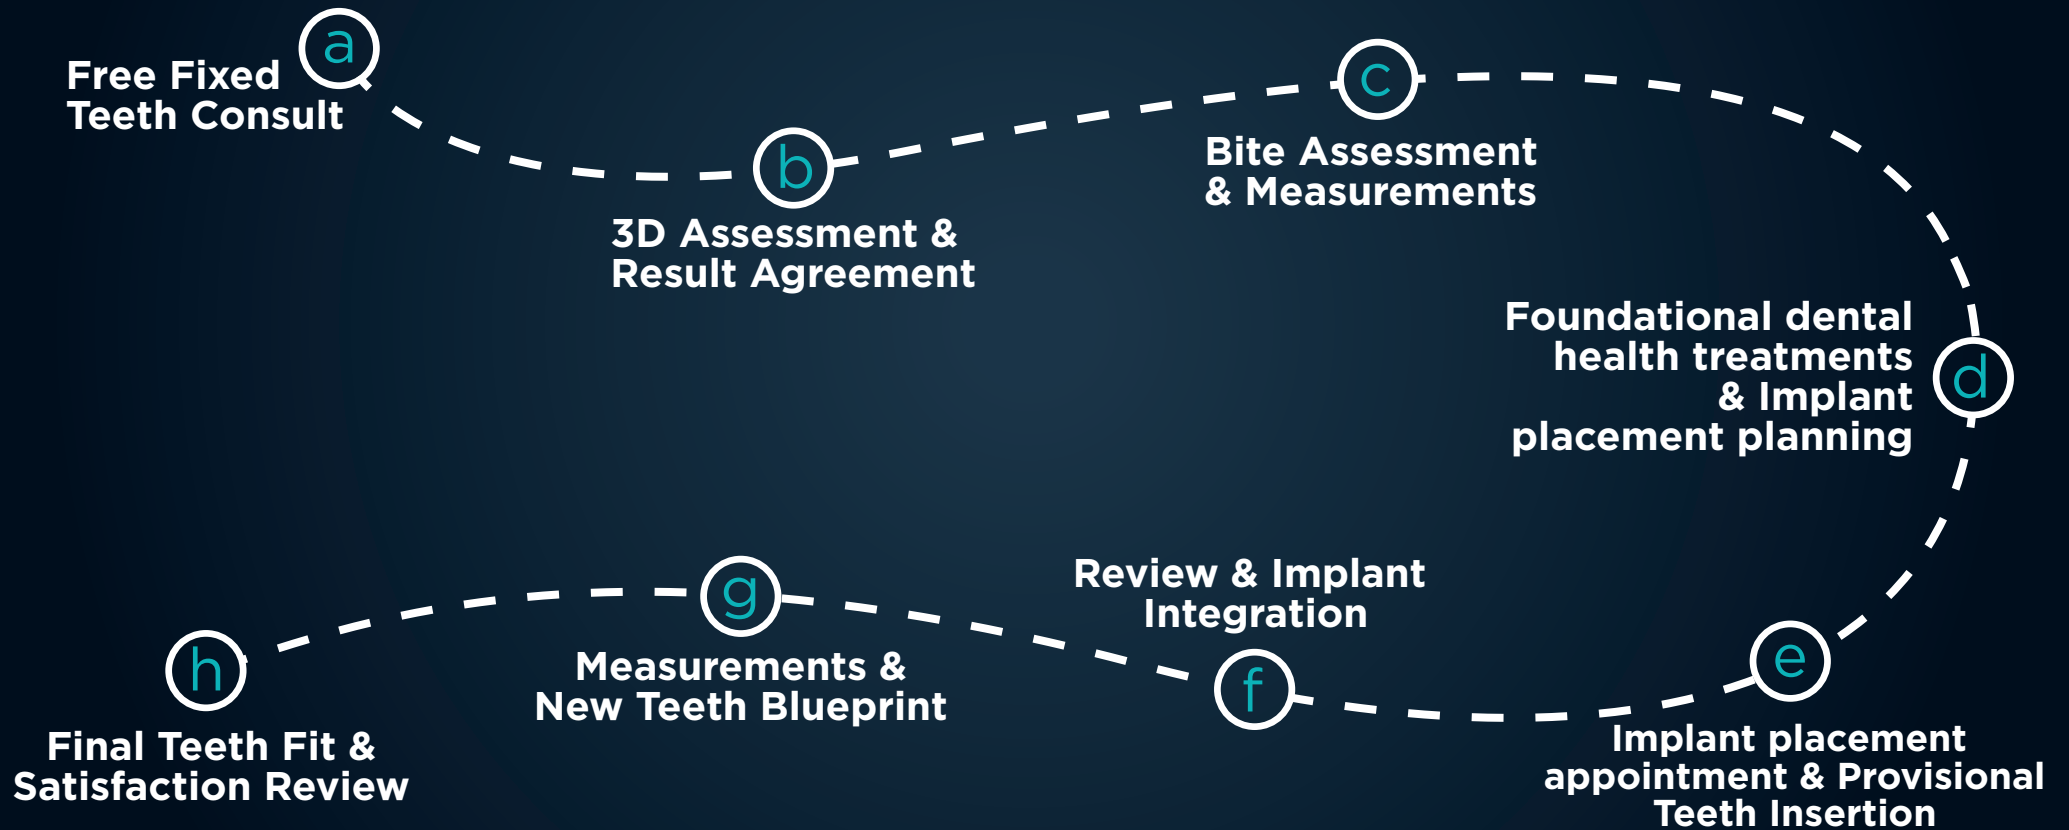

Got loose dentures and want to be able to chew
and taste food properly again?

Unhappy with your severely damaged teeth?

SINGLE TOOTH IMPLANT SOLUTION

Steps

SameDayTeethSuite

SOLUTIONS

SINGLE TOOTH SOLUTIONS

MULTIPLE TEETH SOLUTIONS

IMPLANT DENTURE SOLUTIONS

TEETH IN A DAY SOLUTIONS

SINGLE TOOTH IMPLANT SOLUTION

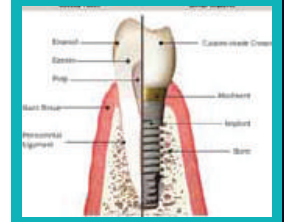

STEP 1 CONSULTATION

An examination and friendly discussion with our expert Dr Kalpesh Bohara

STEP 4 IMPLANT INTEGRATION

Rest for 3-6 months to allow the implant to bond strongly with the bone to become a rock solid support for your new tooth.

STEP 2 X-RAYS OR CT SCAN

CT scanner specifically design for dental use at our practice. No hospital visits required.

STEP 5 DESIGN & CRAFT NEW TOOTH

Now that the implant is healed our master technicians can craft a tooth coloured crown to blend and match your teeth according to your smile requirements.

STEP 3 IMPLANT FITTING

The implant is placed into the correct site using using the 3D guide & pre-planned surgery.

MULTIPLE TEETH IMPLANTSOLUTIONS

Final = Implant retained bridge.

3. Premium

6-12 Implants at front, back & middle.

Bone & soft tissue augmentation for more natural result.

High level fixed provisional teeth.

Final = Fully bespoke Implant retained bridge with ultimate aesthetics.

Cheaper Quote? There are 3 areas to consider.

Implant Quality / Cheaper Implant?

Final Teeth Appearance, Quality & Strength / Cheaper Lab?

Time taken to ensure the best possible result / Work faster?

With a Cheaper Quote: **What have they removed to make it cheaper?**

Maybe no 3D planning

Higher risk of damaging blood vessels, nerves & vital structures, then what happens?

Maybe a cheaper implant

Copy implant system. No regulations and standardisation in manufacture. What happens if the implant screw breaks? Is it supported? Can spare parts be order 5 years from now or is it a fly by night company and you may be stuck with an unusable implant that needs to be surgically removed?

Maybe a cheaper lab technician

Is the final result going to look natural? Is the bridge going to fit perfectly on the implants or will there be some fit issues? Fit issues may look ok on the day but they can cause implants to fail if they transmit the forces onto the implant in the wrong way leading to a painful and expensive failure and loosening of your new teeth.

Maybe no bite analysis

A huge cause of implant failure is overloading of the implants by fitting implants without any bite adjustments. Your jaw muscles are strong enough to bite through wood on your back teeth and implants that are loaded incorrectly due to no bite analysis will fail upto 10x faster leaving you with a lot of pain and expensive re-treatment bills.

Maybe no guaranteed satisfaction

One off treatment with no after care service. Stuck with the result, no input into final result & appearance.
